TO THE READER

The older population of Florida, as well as of the United States, is growing faster than the population as a whole. The increasing number and proportion of the elderly reflect demographic changes that are already having pervasive influences on the economy and on public policy regarding health and other supportive human services in the state. These trends underscore the need for information to reveal the constantly changing makeup of the older population, the economic and social conditions confronting older people in different regions of the state, and the effectiveness with which public and private resources are being mobilized to adjust to these changes.

This publication is a result of an on-going program to maintain and to disseminate current information on older people in Florida. The data are gathered from many sources, including federal documents, survey data, state agencies, other public information files, and private reports and records. And while every effort has been made to report uniform time periods, age-race-sex groupings and geographical units, reliance on these multiple sources makes such consistency difficult to achieve.

This volume should be considered as an interim or preliminary one because information from the 1980 Census of Population and Housing was not available at press time. The 1978 edition of Older People in Florida contained more 1970 Census data than this issue. That 1978 edition also contained some county estimates for 1975 of income and population data. This 1980-81 edition includes updated county and state information whenever possible. In addition, much national and southern regional information is included to make users aware of these sources and to provide a broad picture against which local experiences can be viewed. The 1982-83 edition of Older People in Florida will attempt to organize and present the 1980 Census information about older people and will also update the series included in this 1980-81 edition. Readers who do not need age-related data will find the annual Florida Statistical Abstract a useful source of demographic and economic information about Florida and its counties.

Usually information is presented for the total population as well as the older population so that comparisons can be made. The reader is urged to use the "county data," "state data," and "U.S. data" sections in the index to find those tables with data for Florida counties, other states, or the nation as a whole.

In 1976 the federal fiscal year was changed to extend from October 1 of one year through September of the next. The fiscal year of the State of Florida is July 1 of one year through June 30 of the next. Unless fiscal year is stated in a table title, data are for the calendar year or the particular date specified.

The sources for all the information published here are listed at the bottom of the tables. The reader can use these listings as a starting point to find additional information. Frequently the publication itself contains more data than could be included on the table, or the agency issuing the information may have more information or more recent information.

The preparation of this edition of Older People in Florida was shared by many members of the staffs of the Bureau of Economic and Business Research and the Center for Gerontological Studies. Frances Terhune served as coordinator of staff activities and directed the collection of data sources. Susan Floyd was responsible for the required statistical computations, for coding and auditing the data, and for supervising the page layouts. She was assisted by statistican Denise Witte, statistical aide Debbie Mann, and student assistants Kathleen Bragan, Michael D' Ambrosio, Judith French, and Cynthia Wold. Graduate assistants Raymond DeMarco, Bruce Kuhlman, Hazel Robinson, and Robert Snyder participated in the search for and compilation of data. Evan Eldridge supervised data processing and created the computer maps. Leo Wierzbowski was responsible for computer programming; Genevieve Floyd was the data processing coordinator, assisted by Maria Arevalo, Joy Brandies, Parker Painter, Donald Morrison, and Elizabeth Latimer. Nellie Widener supervised the keypunching of the data, assisted by Phyllis Lee and Sandra Molnar. Dorothy Evans prepared one-half of the tables, the chapter introductions, and the index on the word processor. Lois Wiechmann prepared the page layouts assisted by Grace Scarboro and Kelley Wiechmann. Lois Wiechmann and Frances Terhune indexed the tables. Greg Kerber prepared the maps, and he and Ann Pierce provided editorial consultation and assistance. The cover was designed by Ben Jones. The staff of the University Presses of Florida provided production assistance and handles distribution.

We would be happy to receive suggestions for improving the usefulness of Older People in Florida to you and your organization.

POPULATION

Population analysis involves the current number of people in an area, the composition or distribution of characteristics (e.g., age, sex, race) of those people, and the changes over time in the number and composition of those people. Births and deaths (natural change) and migration in and out of the area are the means by which the population size and composition change. In Florida migration has played the most important role in population change, particularly in the changing age composition of the state. Florida now has the highest percentage of persons aged 65 and over in the country and is rapidly moving toward having the greatest absolute number of persons in this age group by the turn of the century.

The tables presented in this section report statistics on the growth, distribution, and basic characteristics of older people in Florida. Historical and total population (all ages) figures are included for purposes of comparison. Also, both age groups 60 and over and 65 and over are reported where the data allow. The decennial census of 1970 and the Current Population Reports (P-Series) of the U.S. Bureau of the Census serve as the principal sources of information.

The 1980 Census information was not available at press time. Data will be available in 1981 from the U.S. Government Printing Office, Washington, D.C., in most local libraries, and in the 1981 Florida Statistical Abstract (available in October 1981 from the Bureau of Economic and Business Research, University of Florida). A full report of 1980 Census data about older persons will appear in the 1982-83 edition of this book (available Fall 1982).

Individuals are considered residents of an area if they have designated this community as their usual place of residence, that is, where they "live and sleep most of the time." It may not be their legal residence, voting residence, or domicile. Persons in the armed forces are counted as residents of the area where their installations are located. College students are considered residents of the communities in which they reside while attending college. The term standard metropolitan statistical area (SMSA) refers to a county or group of contiguous counties which contain at least one central city of 50,000 inhabitants.

Population statistics for intercensual years for Florida may be found in Florida Estimates of Population and Population Studies, both published by the Bureau of Economic and Business Research, University of Florida. A discussion of the methodology for making age estimates appears in Bulletin 52 of Population Studies. Any current estimate of population, particularly at lower levels of aggregation (i.e. county), must be considered only in light of assumptions about migration trends. Estimate data on tables in this section assume that the net effect of migration on the age, race, and sex components of a county's population was similiar between 1970 and 1979 to the change between 1960 and 1970. Figures for age, race, and sex may be accurate or may over- or underestimate age-race-sex components for a given county to the degree to which this assumption holds for that county.

1979 A/	15,459	9,652	2,370	984	1,616	837

A/ CHANGES EXHIBITED IN NET MIGRATION PATTERNS ARE OF SUCH DEGREE THAT ESTIMATES SHOULD BE CONSIDERED LESS RELIABLE THAN THOSE FOR THE OTHER COUNTIES.

B/ ESTIMATES INCORPORATE INFORMATION COLLECTED IN SPECIAL CENSUSES TAKEN SINCE 1970. CHANGES IN NET MIGRATION PATTERNS IN PASCO MAKE ITS ESTIMATE LESS RELIABLE THAN FOR OTHER COUNTIES.

NOTE: DIFFERENCES IN 1979 ESTIMATES OF VARIOUS AGE GROUPS OF THE POPULATION FROM PREVIOUS YEARS MAY BE DUE TO IMPROVEMENT IN METHODOLOGY AND SHOULD NOT BE USED AS PARTS OF TIME SERIES FOR INDIVIDUAL COUNTIES. AGE BREAKDOWNS OF POPULATION FOR COUNTIES BY RACE AND SEX ARE AVAILABLE FOR A FEE FROM THE BUREAU OF ECONOMIC AND BUSINESS RESEARCH. THE ASSUMPTION THAT THE NET EFFECT OF MIGRATION ON THE AGE, RACE, AND SEX COMPONENTS OF A COUNTY'S POPULATION WAS SIMILAR BETWEEN 1970 AND 1979 TO THE CHANGE OBSERVED BETWEEN 1960 AND 1970 IS IMPLICIT IN THE METHODOLOGY USED TO COMPUTE THESE ESTIMATES. THE ACCURACY OF THE ESTIMATES IS DIRECTLY RELATED TO THE DEGREE TO WHICH THIS ASSUMPTION HOLDS FOR A GIVEN COUNTY.

SOURCE: DATA FOR 1950 THROUGH 1970 FROM U.S., DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS. DATA FOR 1979 FROM UNIVERSITY OF FLORIDA, BUREAU OF ECONOMIC AND BUSINESS RESEARCH, POPULATION STUDIES, AND UNPUBLISHED DATA.

Percentage Change In Population Aged 65 And Over, 1970-79

1/ THESE COUNTIES EXHIBITED CHANGES IN NET MIGRATION PATTERNS OF SUCH DEGREE THAT ESTIMATES FOR THEM SHOULD BE CONSIDERED LESS RELIABLE THAN THOSE FOR THE OTHER COUNTIES.

2/ DATA INCORPORATE INFORMATION COLLECTED IN SPECIAL CENSUSES SINCE 1970. CHANGES IN NET MIGRATION PATTERNS IN PASCO MAKE ITS ESTIMATE LESS RELIABLE THAN FOR OTHER COUNTIES.

NOTE: DIFFERENCES IN 1979 ESTIMATES OF VARIOUS AGE GROUPS OF THE POPULATION FROM PREVIOUS YEARS MAY BE DUE TO IMPROVEMENT IN METHODOLOGY AND SHOULD NOT BE USED AS PARTS OF TIME SERIES FOR INDIVIDUAL COUNTIES. AGE BREAKDOWNS OF POPULATION FOR COUNTIES BY RACE AND SEX ARE AVAILABLE FOR A FEE FROM THE BUREAU OF ECONOMIC AND BUSINESS RESEARCH. THE ASSUMPTION THAT THE NET EFFECT OF MIGRATION ON THE AGE, RACE, AND SEX COMPONENTS OF A COUNTY'S POPULATION WAS SIMILAR BETWEEN 1970 AND 1979 TO THE CHANGE OBSERVED BETWEEN 1960 AND 1970 IS IMPLICIT IN THE METHODOLOGY USED TO COMPARE THESE ESTIMATES. THE ACCURACY OF THE ESTIMATES IS DIRECTLY RELATED TO THE DEGREE TO WHICH THIS ASSUMPTION HOLDS FOR A GIVEN COUNTY.

SOURCE: DATA FOR 1970 FROM U.S., DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS. DATA FOR 1979 FROM UNIVERSITY OF FLORIDA, BUREAU OF ECONOMIC AND BUSINESS RESEARCH, POPULATION STUDIES, AND UNPUBLISHED DATA.

1/ THESE COUNTIES EXHIBITED CHANGES IN NET MIGRATION PATTERNS OF SUCH DEGREE THAT ESTIMATES FOR THEM SHOULD BE CONSIDERED LESS RELIABLE THAN THOSE FOR THE OTHER COUNTIES.

2/ DATA INCORPORATE INFORMATION COLLECTED IN SPECIAL CENSUSES SINCE 1970. CHANGES IN NET MIGRATION PATTERNS IN PASCO MAKE ITS ESTIMATE LESS RELIABLE THAN FOR OTHER COUNTIES.

NOTE: DIFFERENCES IN 1979 ESTIMATES OF VARIOUS AGE GROUPS OF THE POPULATION FROM PREVIOUS YEARS MAY BE DUE TO IMPROVEMENT IN METHODOLOGY AND SHOULD NOT BE USED AS PARTS OF TIME SERIES FOR INDIVIDUAL COUNTIES. AGE BREAKDOWNS OF POPULATION FOR COUNTIES BY RACE AND SEX ARE AVAILABLE FOR A FEE FROM THE BUREAU OF ECONOMIC AND BUSINESS RESEARCH. THE ASSUMPTION THAT THE NET EFFECT OF MIGRATION ON THE AGE, RACE, AND SEX COMPONENTS OF A COUNTY'S POPULATION WAS SIMILAR BETWEEN 1970 AND 1979 TO THE CHANGE OBSERVED BETWEEN 1960 AND 1970 IS IMPLICIT IN THE METHODOLOGY USED TO COMPARE THESE ESTIMATES. THE ACCURACY OF THE ESTIMATES IS DIRECTLY RELATED TO THE DEGREE TO WHICH THIS ASSUMPTION HOLDS FOR A GIVEN COUNTY.

NOTE: PROJECTIONS PUBLISHED HERE ARE THE SERIES II-A PROJECTIONS OF THE U.S. BUREAU OF THE CENSUS. THIS SERIES IS BASED ON ESTIMATED MIGRATION RATES BY AGE, RACE, AND SEX FOR 1965 TO 1975. THE SOURCE ALSO CONTAINS PROJECTIONS BASED ON 1970 TO 1975 MIGRATION RATES AND PROJECTIONS WHICH ASSUME NO MIGRATION. ALL THREE SERIES ARE PROJECTIONS OR EXTENSIONS OF RECENT TRENDS RATHER THAN FORECASTS OF POPULATION LEVELS EXPECTED TO OCCUR.

SOURCE: U.S., DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS, *CURRENT POPULATION REPORTS: ILLUSTRATIVE PROJECTIONS OF STATE POPULATIONS BY AGE, RACE, AND SEX, 1975 TO 2000*. SERIES P-25, NO. 796.

MONROE	56,509	59.5	60.4	61.0	64.6	68.7	72.5

NOTE: STATE PROJECTIONS ARE BASED ON THREE DIFFERENT SETS OF ASSUMPTIONS REGARDING ANNUAL MIGRATION. THE HIGH PROJECTIONS ARE SIMILAR TO THE LARGE MIGRATION LEVELS OF THE FIRST HALF OF THE 1970S WHEN MORE PEOPLE WERE MIGRATING TO FLORIDA THAN EVER BEFORE. THE LOW MIGRATION LEVELS ARE SIMILAR TO THOSE BETWEEN 1975 AND 1977 WHEN FLORIDA POPULATION GROWTH RATES WERE AMONG THE LOWEST SINCE WORLD WAR II. THE MEDIUM ASSUMPTIONS IMPLY ANNUAL NET MIGRATION LEVELS SIMILAR TO THE AVERAGE IN THE 1970S. COUNTY PROJECTIONS ARE BASED ON THE RATIO OF EACH COUNTY'S SHARE OF THE TOTAL STATE INCREASE FROM 1970-79.

SOURCE: UNIVERSITY OF FLORIDA, BUREAU OF ECONOMIC AND BUSINESS RESEARCH, POPULATION STUDIES, AND UNPUBLISHED DATA.

INCOME

This section includes statistics on money income and poverty status for aged units (individuals, households, or families) in the state and counties of Florida. Current money income usually consists of the sum of all income received before taxes (during the year preceding the survey) by an aged unit from selected sources. Major sources of income for the elderly usually include, in order of importance: earnings/social security, asset income, private pensions, supplemental security income, and government employee pensions. Money receipts exclude income from sale of nonbusiness-related property (real property, stocks, and bonds), bank deposit withdrawals, loans, tax refunds, gifts, and lump-sum inheritance of insurance benefits. For statistics on family or household income, the combined income of all members of each family (household) is treated as a single amount. For income of unrelated individuals, such as widows, the classification is by the amount of their own total income.

Income data from the 1976 Survey of Income and Education (SIE) of the U.S. Bureau of the Census have been added to decennial information sources to provide current estimates of income in the state of Florida and at the county level. Estimates derived from the SIE were adjusted for selected sex/age groups to correct for sampling error by using calculations of intercensal income trends at the state and county levels.

Poverty thresholds define levels of income that divide families (or households) of differing composition, place, and time into the poor and near poor. Specifically, the modified Orshansky thresholds, adopted by the Federal Interagency Committee in 1969 and updated annually on the basis of the income sample of the U.S. Bureau of the Census Current Population Survey, vary by (1) family size and composition and (2) sex and age of family head and are adjusted for (3) annual changes in the Consumer Price Index (CPI) and (4) differences between farm and nonfarm residence (see P-60 Series of Current Population Reports for annual updates). Like the poverty threshold, the U.S. Bureau of Labor Statistics (BLS) budgets for retired couples are standards based on the estimated costs of required consumer items for aged couples in different urban locations.

Table 5.13 in Section 5:00 (Housing) contains information on occupied housing units by income distribution and median household income.

The March 1980 Current Population Survey (CPS) incorporated the use of the "householder" concept rather than the traditional "head" concept. Under the new procedure, the householder is the first adult household member listed on the questionnaire. The instructions call for listing first the person (or one of the persons) in whose name the home is owned or rented. If the house is owned jointly by a married couple, either the husband or wife may be listed first, thereby becoming the reference persons, or householder, to whom the relationship of the other household members is recorded. According to past practices, the husband was always designated as the head in a husband-wife family.

TABLE 2.01. MONEY INCOME: PERCENTAGE DISTRIBUTION OF FAMILIES BY TOTAL MONEY INCOME AND MEDIAN AND MEAN FAMILY INCOME IN THE UNITED STATES, SPECIFIED YEARS 1950 THROUGH 1979

ITEM	1950	1955	1960	1965	1970	1971	1972

A/ DATA FOR SOME CITIES HAVE BEEN REVISED.

NOTE: THESE ESTIMATES ARE BASED ON A MONEY INCOME CONCEPT. TOTAL MONEY INCOME IS DEFINED BY THE BUREAU OF THE CENSUS FOR STATISTICAL PURPOSES AS THE SUM OF WAGE AND SALARY INCOME, NET NONFARM SELF-EMPLOYMENT INCOME, NET FARM SELF-EMPLOYMENT INCOME, SOCIAL SECURITY AND RAILROAD RETIREMENT INCOME, PUBLIC ASSISTANCE INCOME, AND ALL OTHER INCOME SUCH AS INTEREST, DIVIDENDS, VETERANS' PAYMENTS, PENSIONS, UNEMPLOYMENT INSURANCE, ALIMONY, ETC. THE TOTAL REPRESENTS THE AMOUNT OF INCOME RECEIVED BEFORE DEDUCTIONS FOR PERSONAL INCOME TAXES, SOCIAL SECURITY, BOND PURCHASES, UNION DUES, MEDICARE DEDUCTIONS, ETC.

SOURCE: U.S., DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS, CURRENT POPULATION REPORTS: POPULATION ESTIMATES AND PROJECTIONS. SERIES P-25, NO. 885.

A/ LESS THAN 0.5 PERCENT.

1/ RECIPIENTS OF SOCIAL SECURITY MAY BE RECEIVING RETIRED-WORKER BENEFITS, DEPENDENTS' OR SURVIVORS' BENEFITS, DISABILITY BENEFITS, TRANSITIONALLY INSURED, OR SPECIAL AGE-72 BENEFITS.

NOTE: RECEIPT OF SOURCES IS ASCERTAINED BY RESPONSE TO A YES/NO QUESTION WHICH IS IMPUTED BY CURRENT POPULATION SURVEY. A MARRIED COUPLE RECEIVES A SOURCE IF ONE OR BOTH PERSONS ARE RECIPIENTS OF THAT SOURCE. A UNIT IS A MARRIED COUPLE LIVING TOGETHER OR A NONMARRIED PERSON. A NONMARRIED PERSON MAY BE WIDOWED, DIVORCED, OR NEVER MARRIED.

1/ STANDARD METROPOLITAN STATISTICAL AREA AS DEFINED IN 1960-61.

2/ PLACES WITH POPULATION OF 2,500 TO 50,000.

3/ INCLUDES SHELTER, HOUSEFURNISHINGS, AND HOUSEHOLD OPERATIONS. HIGHER BUDGET ALSO INCLUDES AN ALLOWANCE FOR LODGING AWAY FROM HOME CITY.

4/ AVERAGE COSTS OF SHELTERS WERE WEIGHTED BY THE FOLLOWING PROPORTIONS: LOWER BUDGET, 40 PERCENT FOR RENTERS, 60 PERCENT FOR HOMEOWNERS; INTERMEDIATE BUDGET, 35 PERCENT FOR RENTERS, 65 PERCENT FOR HOMEOWNERS; HIGHER BUDGET, 30 PERCENT FOR RENTERS, 70 PERCENT FOR HOMEOWNERS.

5/ INCLUDES AVERAGE CONTRACT RENT PLUS THE COST OF REQUIRED AMOUNTS OF HEATING FUEL, GAS, ELECTRICITY, WATER, SPECIFIED EQUIPMENT, AND INSURANCE ON HOUSEHOLD CONTENTS.

6/ INCLUDES PROPERTY TAXES, INSURANCE ON HOUSE AND CONTENTS, WATER, REFUSE DISPOSAL, HEATING FUEL, GAS, ELECTRICITY, SPECIFIED EQUIPMENT, AND HOME REPAIR AND MAINTENANCE COSTS.

7/ AVERAGE COSTS OF AUTOMOBILE OWNERS AND NONOWNERS IN THE LOWER BUDGET WERE WEIGHTED BY THE FOLLOWING PROPORTIONS OF FAMILIES: METROPOLITAN AREAS, 45 PERCENT FOR OWNERS, 55 PERCENT FOR NONOWNERS; NONMETROPOLITAN AREAS, 55 PERCENT FOR OWNERS, 45 PERCENT FOR NONOWNERS. THE INTERMEDIATE BUDGET PROPORTIONS ARE: METROPOLITAN AREAS, 60 PERCENT FOR OWNERS, 40 PERCENT FOR NONOWNERS; NONMETROPOLITAN AREAS, 68 PERCENT FOR OWNERS, 32 PERCENT FOR NONOWNERS. THE HIGHER BUDGET PROPORTION IS 100 PERCENT FOR OWNERS.

8/ INCLUDES AVERAGE COSTS FOR READING, RECREATION, TOBACCO PRODUCTS, ALCOHOLIC BEVERAGES, AND MISCELLANEOUS EXPENDITURES.

9/ INCLUDES ALLOWANCES FOR GIFTS AND CONTRIBUTIONS. HIGHER BUDGET ALSO INCLUDES AN ALLOWANCE FOR LIFE INSURANCE.

NOTE: THE FAMILY CONSISTS OF A RETIRED HUSBAND AND WIFE, AGE 65 OR OVER. TOTAL BUDGET COSTS DO NOT INCLUDE PERSONAL INCOME TAXES. THE 3 BUDGETS ARE MADE UP OF HYPOTHETICAL LISTS OF GOODS AND SERVICES SPECIFIED IN THE MID-1960S TO PORTRAY 3 RELATIVE LEVELS OF LIVING. THEY ARE NOT BASED ON ACTUAL EXPENDITURES. THE LOWER LEVEL DOES NOT REPRESENT SUBSISTENCE OR POVERTY LEVEL, BUT SIMPLY A LEVEL RELATIVELY LOWER THAN THE INTERMEDIATE BUDGET. DATA FOR ORLANDO ARE NO LONGER AVAILABLE.

EMPLOYMENT

This section includes information on labor force characteristics, employment and unemployment, and occupational classifications of the total population and of older persons.

Economic welfare for most individuals and families depends upon employment. The basis of statistics on the employment status of the population is a monthly Current Population Suvey conducted by the U.S. Bureau of the Census.

Employed persons are defined in the Handbook of Labor Statistics as comprising "all those who, during the survey week, worked at all as paid employees, in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers in an enterprise operated by a family member" and all those temporarily absent from their jobs due to such factors as illness or vacation.

Unemployed persons are defined as those "who did not work during the survey week, who made specific efforts to find a job within the previous four weeks, and who were available to work during the survey week except for temporary illness."

The civilian labor force is made up of all civilians classified as employed or unemployed. The unemployment rate is the number of unemployed expressed as a percentage of the civilian labor force. Persons 16 years of age and older not classified as employed or unemployed are counted as not in the labor force.

The U.S. Bureau of Labor Statistics compiles statistics and publishes data on nonagricultural employment in Florida and its standard metropolitan statistical areas (SMSAs). Its publications include Employment and Earnings: States and Areas, State Profile of Employment and Unemployment, and the Handbook of Labor Statistics. Another source of data on employment is the decennial Census of Population conducted by the U.S. Bureau of the Census.

The Bureau of Research and Analysis, Division of Employment Security in the Florida Department of Labor and Employment Security prepares employment estimates for Florida and its counties. The methods of preparing these estimates follow procedures developed in cooperation with the U.S. Bureau of Labor Statistics. The Florida Bureau of Research and Analysis does not regularly publish age-related employment figures, but the state office in Tallahassee or local labor market analysts (in local Employment Security offices) may have available unpublished estimates of employment and unemployment by age.

TABLE 3.01. WORKERS AND EARNINGS: NUMBER OF WORKERS WITH TAXABLE EARNINGS AND MEDIAN EARNINGS FOR ALL WORKERS AND WORKERS AGED 50 AND OVER BY SEX IN THE UNITED STATES, SPECIFIED YEARS 1940 THROUGH 1977

SEX AND YEAR	TOTAL	AGED 50 TO 54	AGED 55 TO 59	AGED 60 TO 61	AGED 62 TO 64	AGED 65 TO 69	AGED 70 TO 71	AGED 72 AND OVER

AGED 65 AND OVER	0.12	1.52	0.15	-0.25	-0.02	-2.12	-2.16

1/ PERCENTAGE OF CIVILIAN NONINSTITUTIONAL POPULATION IN THE CIVILIAN LABOR FORCE.

2/ COMPOUNDED CONTINUOUSLY.

NOTE: HIGH, INTERMEDIATE, AND LOW GROWTH PROJECTIONS ARE BASED ON DIFFERENT ASSUMPTIONS ABOUT THE LABOR FORCE PARTICIPATION RATES FOR VARIOUS POPULATION GROUPS. HIGH GROWTH PRESUMES A CONTINUING SURGE IN THE LABOR FORCE PARTICIPATION OF WOMEN; LOW GROWTH PRESUMES THAT PARTICIPATION RATES FOR WOMEN COULD GROW AT A MUCH SLOWER PACE, CORRESPONDING WITH A PROJECTED INCREASE IN CURRENTLY LOW FERTILITY RATES; INTERMEDIATE GROWTH PRESUMES THE PARTICIPATION RATE OF WOMEN WOULD CONTINUE TO ADVANCE AT ITS CURRENT PACE UNTIL 1985, THEN TAPER OFF WITH MORE MODERATE INCREASES BY 1990. SEE U.S., BUREAU OF LABOR STATISTICS, MONTHLY LABOR REVIEW, DECEMBER 1978 FOR A FULLER DISCUSSION.

VITAL STATISTICS AND HEALTH

The Florida Department of Health and Rehabilitative Services, Public Health Statistics Section is the principal source of vital statistics for Florida and its counties. Data are released on a monthly basis for later accumulated in two annual reports, Florida Vital Statistics and Florida Morbidity Statistics. These publications have detailed information on deaths by cause, marriages, divorces, and reported diseases. It is well known that many diseases are incompletely reported but the degree of underreporting is not known.

The term resident is used to indicate deaths among residents of a specific area regardless of where the event took place, while recorded is the term used to identify deaths occurring in the specified area regardless of the usual residence of the person counted. Data in this section are for resident deaths; data on recorded deaths are available from the source.

The underlying cause of death is determined from death certificate medical information in accordance with procedures established by the World Health Organization and the National Center for Health Statistics. Standardized codes are assigned from the International Classification of Diseases as adapted for use in the United States.

The Mental Health Program Office of the Florida Department of Health and Rehabilitative Services publishes each year the Statistical Report of Hospitals, containing information on admissions, discharges, and types of illnesses.

Information on health services, facilities, and employment are found in Section 9.00.

TABLE 4.03. RESIDENT DEATHS: NUMBER OF DEATHS AND DEATH RATES PER 1,000 POPULATION BY LEADING CAUSE FOR PERSONS AGED 45 AND OVER IN FLORIDA, 1968 AND 1978

CAUSE OF DEATH	DEATHS, 1968		DEATHS, 1978

HOUSING

Basic information on the dwellings in which older people live is presented in this section. The central concept in these tables is the housing unit, defined by the U.S. Bureau of the Census as a "group of rooms or a single room occupied or intended for occupancy as separate living quarters." That is, the occupants do not live and eat with any other persons in the structure, access from the outside is either direct or through a common hall, and there are kitchen facilities for the exclusive use of the occupants. Transient accomodations, barracks for workers, and institutional quarters are not counted as housing units.

National, regional, and selected SMSA data are gathered in the Annual Housing Survey taken by the U.S. Bureau of the Census for the Department of Housing and Urban Development. The most recent U.S. survey available is 1977 (Series H-151) used in this section. Two Florida SMSAs are among the 60 in the U.S. for which surveys are also taken. Data from the Orlando 1974 survey and Miami 1975 survey are also included in this section. Data for 1977 for Orlando should be available in early 1981 in Series H-170-77-11 available from the U.S. Government Printing Office, Washington, D.C.

Table 5.30 provides information on the availability of housing in homes for the aging in facilities which are members of the Florida Association of Homes for the Aging (FAHA). FAHA is a membership organization of nonprofit, residential, personal care, and nursing facilities for the aging.

Data on housing covered under programs of the Department of Housing and Urban Development (HUD) comes from the HUD Statistical Yearbook and from the HUD Jacksonville Area Housing Management Division. A complete discription of HUD programs is available in a booklet entitled Programs of HUD, HUD-214-4-PA(3), issued November 1978. A brief description follows of programs included in this section:

Rental and Cooperative Housing Assistance for Lower-Income Families (Section 236)--Mortgage insurance and interest reduction and operating subsidies to reduce rents for lower-income households. Tenants contribute 25 percent of adjusted income or the basic rent, which ever is greater.

Lower-Income Rental Assistance (Section 8)--HUD makes up the difference between what a lower-income household can afford and the fair market rent for an adequate housing unit. No eligible tenant need pay more than 25 percent of adjusted income toward rent. The rental assistance may be used in existing housing or in new construction, or substantially rehabilitated units.

Rent-Supplements--HUD may pay rent supplements on behalf of eligible tenants to certain private owners of multifamily housing insured by the Federal Housing Administration. The payment makes up the difference between 25 percent of the tenant's adjusted income and the fair market rent determined by HUD.

Low-Income Public Housing--Local public housing agencies develop, own, and operate low-income public housing projects, financing them through the sale of tax-exempt obligations. HUD furnishes technical and professional assistance in planning, developing, and managing the projects and gives financial assistance (preliminary loans for planning and annual contributions to pay the debt service of local obligations, assure low rents, and maintain adequate services and reserve funds). Rents are based on the resident's ability to pay and contribute to the costs of managing and operating the housing.

TRANSPORTATION

Information on the use of or need for transportation facilities by older persons is not easy to obtain. Few means of transportation require any reporting which includes age.

An exception, of course, is the car. Information on driver's licenses by age comes from the Florida Department of Highway Safety and Motor Vehicles. The Division of Florida Highway Patrol in the same department makes available accident information by age in Traffic Accident Facts.

Some indication of the availability of public transit can be gained from local government expenditure as reported in Local Government Financial Report, published by the Florida Department of Banking and Finance.

Information on older people as tourists is published by the U.S. Bureau of the Census in the 1977 Census of Tansportation and in the annual summaries published by the Florida Division of Tourism.

The 1970 Census of Population includes information on the means of transportation to work for persons by various age groups, including older persons. These same data will be available in the 1980 Census of Population taken by the U.S. Bureau of the Census.

SOCIAL INSURANCE AND WELFARE

In this section are data relating to governmental programs for old-age, survivors, disability, and health insurance (OASDHI), popularly known as social security, which provide monthly cash benefits to insured workers and their dependents upon retirement and in cases of disability or death. Data on social security come from the U.S. Department of Health and Human Services, Social Security Administation. This agency is also the source of information about its health insurance plan known as Medicare. The Florida Department of Health and Rehabilitative Services supplies statistics on its programs in the Annual Statistical Report.

Included among the statistics are figures on Supplemental Security Income (SSI) of the Aged in Florida. The SSI program was initiated in 1974 to provide financial assistance to needy persons who reach age 65 or who are blind or disabled and to replace old federal-state public welfare programs to these three groups. The program is administered by the U.S. Social Security Administration under Title XVI of the Social Security Act.

All financial data in this section refer to the time of reimbursement of payment and not to the time service was rendered.

The Health Care Financing Administration (HCFA) in the U.S. Department of Health and Human Services was established to combine health financing and quality assurance programs into a single agency. HCFA is responsible for the medicare program, federal participation in the medicaid program, the Professional Standards Review Organization program, and a variety of other health care assurance programs.

HCFA's Office of Research, Demonstrations, and Statistics (ORDS) conducts studies and projects that demonstrate and evaluate optional reimbursement, coverage, eligibility, and management alternatives to the present Federal programs. ORDS also assesses the impact of HCFA programs on health care costs, program expenditures, beneficiary access to services, health care providers, and the health care industry. In addition, ORDS monitors national health care expenditures and prices and provides actuarial analyses of the costs of current HCFA programs as well as the impact of possible legislative or administrative changes in the programs.

The ORDS issues serveral publications which give national data on medicare, medicaid, health care financing, and other health care matters: Health Care Financing Notes, Health Care Financing Program Statistics, Health Care Financing Trends, and a quarterly magazine with analytical articles, Health Care Financing Review. Information on these publications can be obtained from ORDS Publications, Room 1E9 Oak Meadows Building, 6340 Security Boulevard, Baltimore, Maryland 21235.

PER BILL (DOLLARS)	97	123	120	128	158

1/ REIMBURSEMENT AMOUNTS REPRESENT PAYMENTS FOR COVERED SERVICES BASED ON AN INTERIM RATE (EITHER PER DIEM OR A PERCENT OF TOTAL CHARGES), TO BE ADJUSTED AT THE END OF EACH FACILITY'S OPERATING YEAR ON THE BASIS OF AUDITED REASONABLE COSTS OF OPERATION.

2/ REIMBURSEMENT AMOUNTS REPRESENT THE DOLLARS PAID TO OR ON BEHALF OF THE BENEFICIARY--GENERALLY 80 PERCENT OF THE ALLOWED CHARGES ONCE THE BENEFICIARY HAS SATISFIED THE $60 DEDUCTIBLE IN THE CURRENT YEAR

NOTE: DATA ARE BASED ON ALL CLAIMS FOR MEDICARE AND ARE DERIVED FROM A SAMPLE SELECTED UNDER EACH TYPE OF CARE. THE DATA HAVE BEEN INFLATED TO APPROXIMATE THE ENTIRE MEDICARE POPULATION. THE YEARS INDICATE WHEN CLAIMS WERE APPROVED. DATA ARE FOR BILLS PROCESSED AS OF DECEMBER 28, 1979; THUS, 1979 MAY BE SOMEWHAT UNDERSTATED.

SOURCE: U.S., DEPARTMENT OF HEALTH AND HUMAN SERVICES, HEALTH CARE FINANCING ADMINISTRATION, UNPUBLISHED DATA.

SUPPLEMENTAL MEDICAL INSURANCE 4/	10,966,131	10,529,225	11,142,270

1/ INCLUDES PAYMENTS TO CUBANS.

2/ THE BASIC SSI PROGRAM BECAME A FEDERAL PROGRAM IN JANUARY 1974. PERSONS ELIBIBLE FOR BENEFITS ON THAT DATE UNDER STATE REQUIREMENTS BUT NOT ELIGIBLE UNDER FEDERAL REQUIREMENTS MUST CONTINUE TO RECEIVE MANDATORY STATE SUPPLEMENTATION. NO NEW PERSONS ARE ADDED TO THIS PROGRAM. OPTIONAL STATE SUPPLEMENTATION BENEFITS ARE PAID TO PERSONS ELIGIBLE UNDER CURRENT STATE REQUIREMENTS BUT NOT ELIGIBLE UNDER FEDERAL REQUIREMENTS. THIS PROGRAM IS ON-GOING AND DOES ALLOW FOR NEW ADDITIONS. DETAIL INFORMATION ON DISTRIBUTION BY PROGRAM CATEGORY IS NOT AVAILABLE. THE AMOUNT OF THESE PAYMENTS IS SLIGHTLY OVERSTATED BECAUSE OF ALLOCATION PROBLEMS.

3/ MEDICAID PROVIDES MEDICAL ASSISTANCE FOR PERSONS AND/OR EXPENSES NOT COVERED BY MEDICARE. MEDICAID 65 PAYS THE DEDUCTIBLE PORTION OF ELIGIBLE EXPENSES INCURRED BY MEDICARE ENROLLEES. DATA FOR 1976-77 DO NOT INCLUDE $2,084,465 FOR PATIENT TRANSPORTATION.

4/ INCLUDES OAA, AB, AD, AND AFDC RECIPIENTS AGED 65 AND OLDER. THESE AMOUNTS ARE NOT INCLUDED IN THE TOTALS OR PROGRAM DISTRIBUTION AMOUNTS.

QUALITY OF LIFE

Social indicators are statistics used to describe or measure the conditions (or "quality") of life. The conditions can be indexed according to several categories, i.e., economic, political, environmental, health and education, and general social. Interest has been growing to develop such indicators in order to gauge the improvement or decline in the level of well-being of selected geographical areas (e.g., the South) and some groups (e.g., minorities, the elderly) in society.

The indicators of the Quality of Life used in Tables 8.01 and 8.02 were selected from those thought by Changing Times, The Kiplinger Magazine, or by the editors of this Abstract to represent factors taken into consideration by older people in selecting a place in which they plan to retire. The states included in Table 8.01 are (1) those which have been found to be popular retirement areas, (2) other Sunbelt states, (3) all states with one million or more persons aged 65 or above, and (4) other populous states. The Florida counties listed in Table 8.02 include (1) all those in which 20 percent of the population is 65 or over, (2) all those in which the proportion of elderly persons increased by 100 percent or more from 1970 to 1978, and (3) all counties with 10,000 or more persons aged 65 and over in 1978.

Those interested in comparing Florida with all fifty states or in determining how Florida metropolitan areas fit into the national picture are referred to the following publications: (1) U.S. Office of Federal Statistical Policy and Standards and U.S. Bureau of the Census, Social Indicators, 1976; (2) U.S. Environmental Protection Agency, Washington Environmental Research Center, Quality of Life Indicators in U.S. Metropolitan Areas, 1970; (3) Ben-Chieh Liu, The Quality of Life in the United States, 1970; and (4) Quality of Life Indicators in the U.S. Metropolitan Areas, 1970. Item 1 is obtainable from the U.S. Government Printing Office, item 2 from the source indicated and items 3 and 4 from the Midwest Research Institute, 425 Volker Boulevard, Kansas City, Missouri 64110.

Most of the data included here were first published in the 1980 Florida Statistical Abstract and have been reorganized for this publication.

Also in Section 8.00 are some miscellaneous tables on energy use and voting behavior of older persons.

HEALTH, EDUCATION, AND CULTURAL SERVICES

This section includes information on the facilities and employees who perform health, education, and cultural services and the financial aspects involved.

Information on licensed health service practitioners and professionals comes from the Cooperative Health Statistics System in the Office of Health Planning and Development in the Florida Department of Health and Rehabilitative Services. Another source is Health Resources Statistics published by the National Center for Health Statistics of the U.S. Department of Health and Human Services.

A table has been added which presents data from a special study made by the Florida State University System, Community Hospital Education Council, The Geographic and Specialty Distribution of Physicians in Florida.

Bed capacity of licensed hospitals and nursing homes is reported by the Office of Licensure and Certification in the Florida Department of Health and Rehabilitative Services. Hospital data is also reported by the National Center for Health Statistics in Hospitals: A County and Metropolitan Area Data Book.

The Health Care Financing Administration (HCFA) in the U.S. Department of Health and Human Services was established to combine health financing and quality assurance programs into a single agency. HCFA is responsible for the medicare program, federal participation in the medicaid program, the Professional Standards Review Organization program, and a variety of other health care assurance programs.

HCFA's Office of Research, Demonstrations, and Statistics (ORDS) conducts studies and projects that demonstrate and evaluate optional reimbursement, coverage, eligibility, and management alternatives to the present Federal programs. ORDS also assesses the impact of HCFA programs on health care costs, program expenditures, beneficiary access to services, health care providers, and the health care industry. In addition, ORDS monitors national health care expenditures and prices and provides actuarial analyses of the costs of current HCFA programs as well as the impact of possible legislative or administrative changes in the programs.

The ORDS issues serveral publications which give national data on medicare, medicaid, health care financing, and other health care matters: Health Care Financing Notes, Health Care Financing Program Statistics, Health Care Financing Trends, and a quarterly magazine with analytical articles, Health Care Financing Review. Information on these publications can be obtained from ORDS Publications, Room 1E9 Oak Meadows Building, 6340 Security Boulevard, Baltimore, Maryland 21235.

Library information is supplied by the Division of Library Services of the Florida Department of State.

Tables are included in this section which present data on public health expenditure. The source is the Association of State and Territorial Health Offices.

Data on veterans hospitals comes from the United States Veterans Administration.

TABLE 9.04. PUBLIC HEALTH EXPENDITURE: EXPENDITURE OF STATE HEALTH AGENCIES BY PROGRAM IN FLORIDA, FISCAL YEAR 1977-78

1/ WHEN ALLOWANCE IS MADE FOR NONCLINICAL ACTIVITIES, IT IS ESTIMATED THAT THE 15,744 ACTIVE PHYSICIANS IN FLORIDA IN 1978 EQUATE TO 13,685 FULL-TIME-EQUIVALENT PATIENT CARE PROVIDERS REPRESENTING ALL OF THE SPECIALTIES OF THE PROFESSION.

2/ THESE RATIOS ARE BASED ON AN ADJUSTED POPULATION FIGURE OF 9,830,000, WHICH INCLUDES 292,000 SEASONAL RESIDENTS AND 630,000 SHORT-TERM VISITORS. THIS ADJUSTMENT PRODUCES AN ESTIMATE OF THE TOTAL POPULATION DEMANDING PHYSICIAN SERVICES.

3/ FLORIDA BASELINE PHYSICIAN RATIOS ARE RECOMMENDED PHYSICIAN RATIOS PER 100,000 ADJUSTED POPULATION.

NOTE: DATA MAY NOT ADD TO TOTALS BECAUSE OF ROUNDING FRACTIONAL EFFORT.
